

Quantlet Submission Guide for Members

([GitHub.com/Quantlet](https://github.com/Quantlet))

IRTG 1792 High Dimensional Nonstationary
Time Series

Humboldt-Universität zu Berlin

hu.berlin/irtg1792

Outline

- ▣ Member in GitHub Quantlet organization
- ▣ Submission options:
 1. Submission to existing repository
 2. Fork repository from your account to Quantlet
 3. Create a new repository

Member in GitHub Quantlet organization

- ▣ Check if you are member in the Quantlet organization (login to GitHub first): <https://github.com/orgs/QuantLet/people>
- ▣ If you are not, the owner (Prof. Härdle) or the Quantlet team (quantlet.wiwi@hu-berlin.de) can invite you.

1. Submission to existing repository

There are 2 ways to submit to existing repositories:

- ▣ Directly:

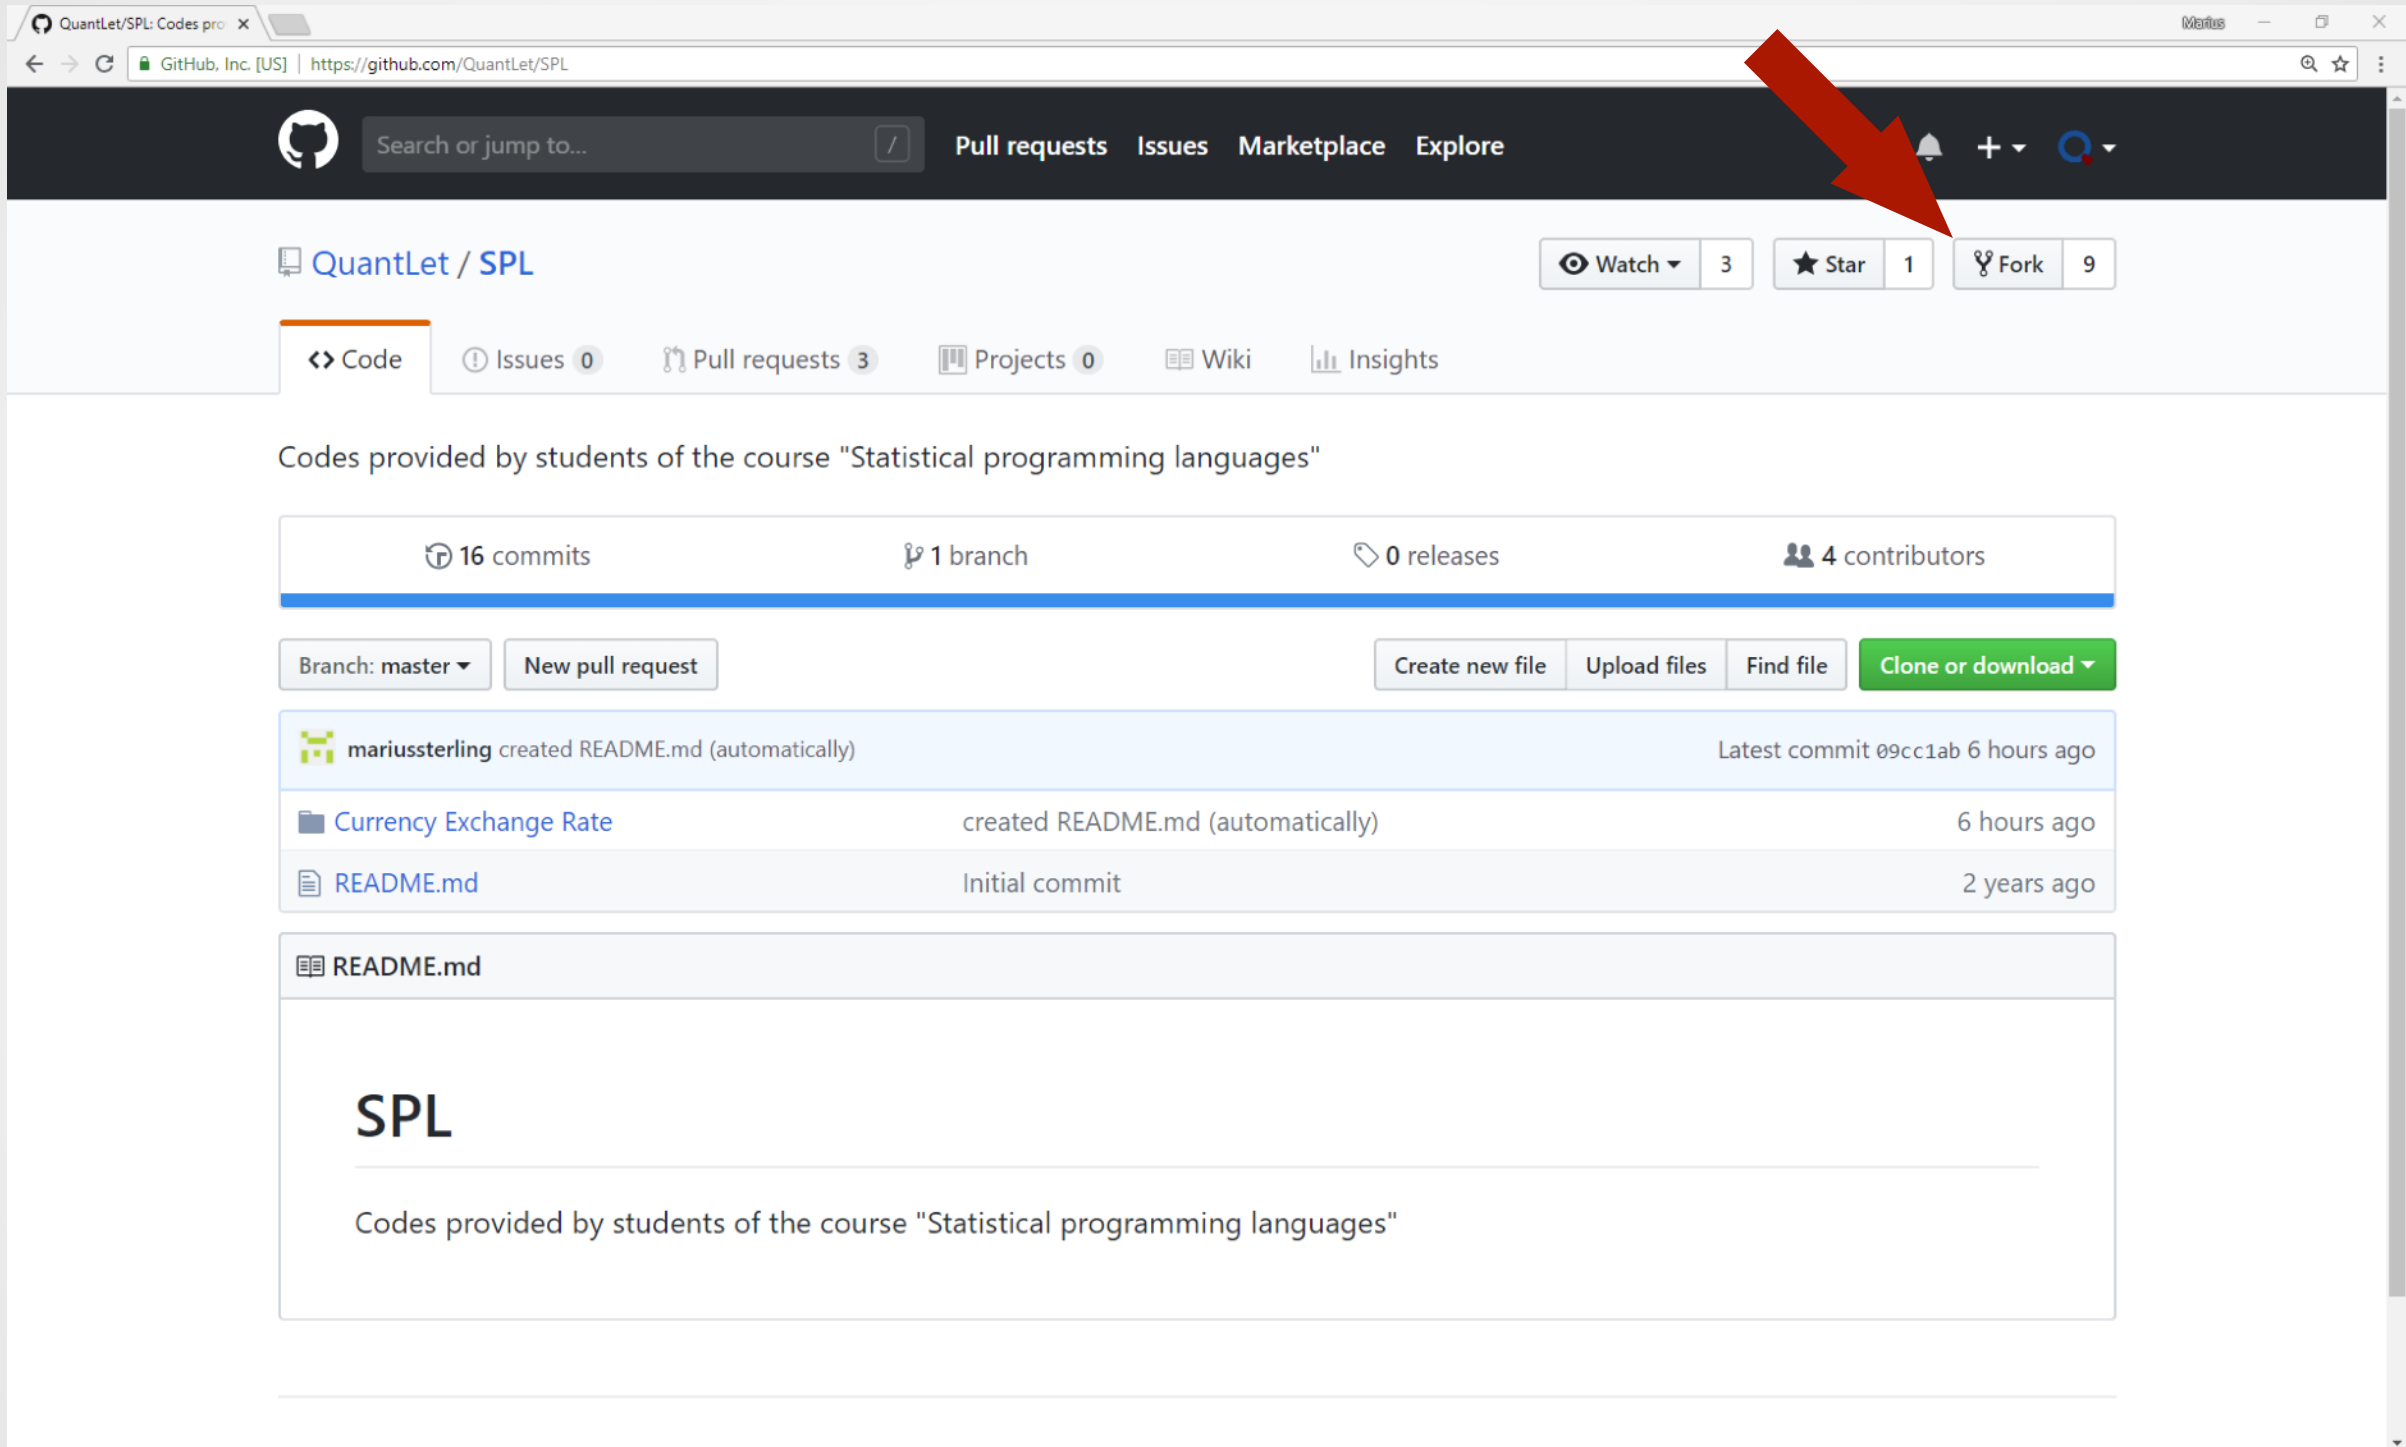

- ▶ You need write privileges (by default only the repository admin has such privileges),
- ▶ the repository admin can grant write privileges,
- ▶ alter the repository as if it was your own.

- ▣ Via pull request:

- ▶ Step 1: Fork the repository,
- ▶ Step 2: Commit changes,
- ▶ Step 3: Create a pull request,
- ▶ the steps will be explained in the following pages.

Step 1: Fork repository

The screenshot shows the GitHub repository page for `QuantLet/SPL`. The repository is described as "Codes provided by students of the course 'Statistical programming languages'". It has 16 commits, 1 branch, 0 releases, and 4 contributors. The repository is currently on the `master` branch. A red arrow points to the `Fork` button in the top right corner of the repository header.

Currency Exchange Rate created README.md (automatically) 6 hours ago

README.md Initial commit 2 years ago

README.md

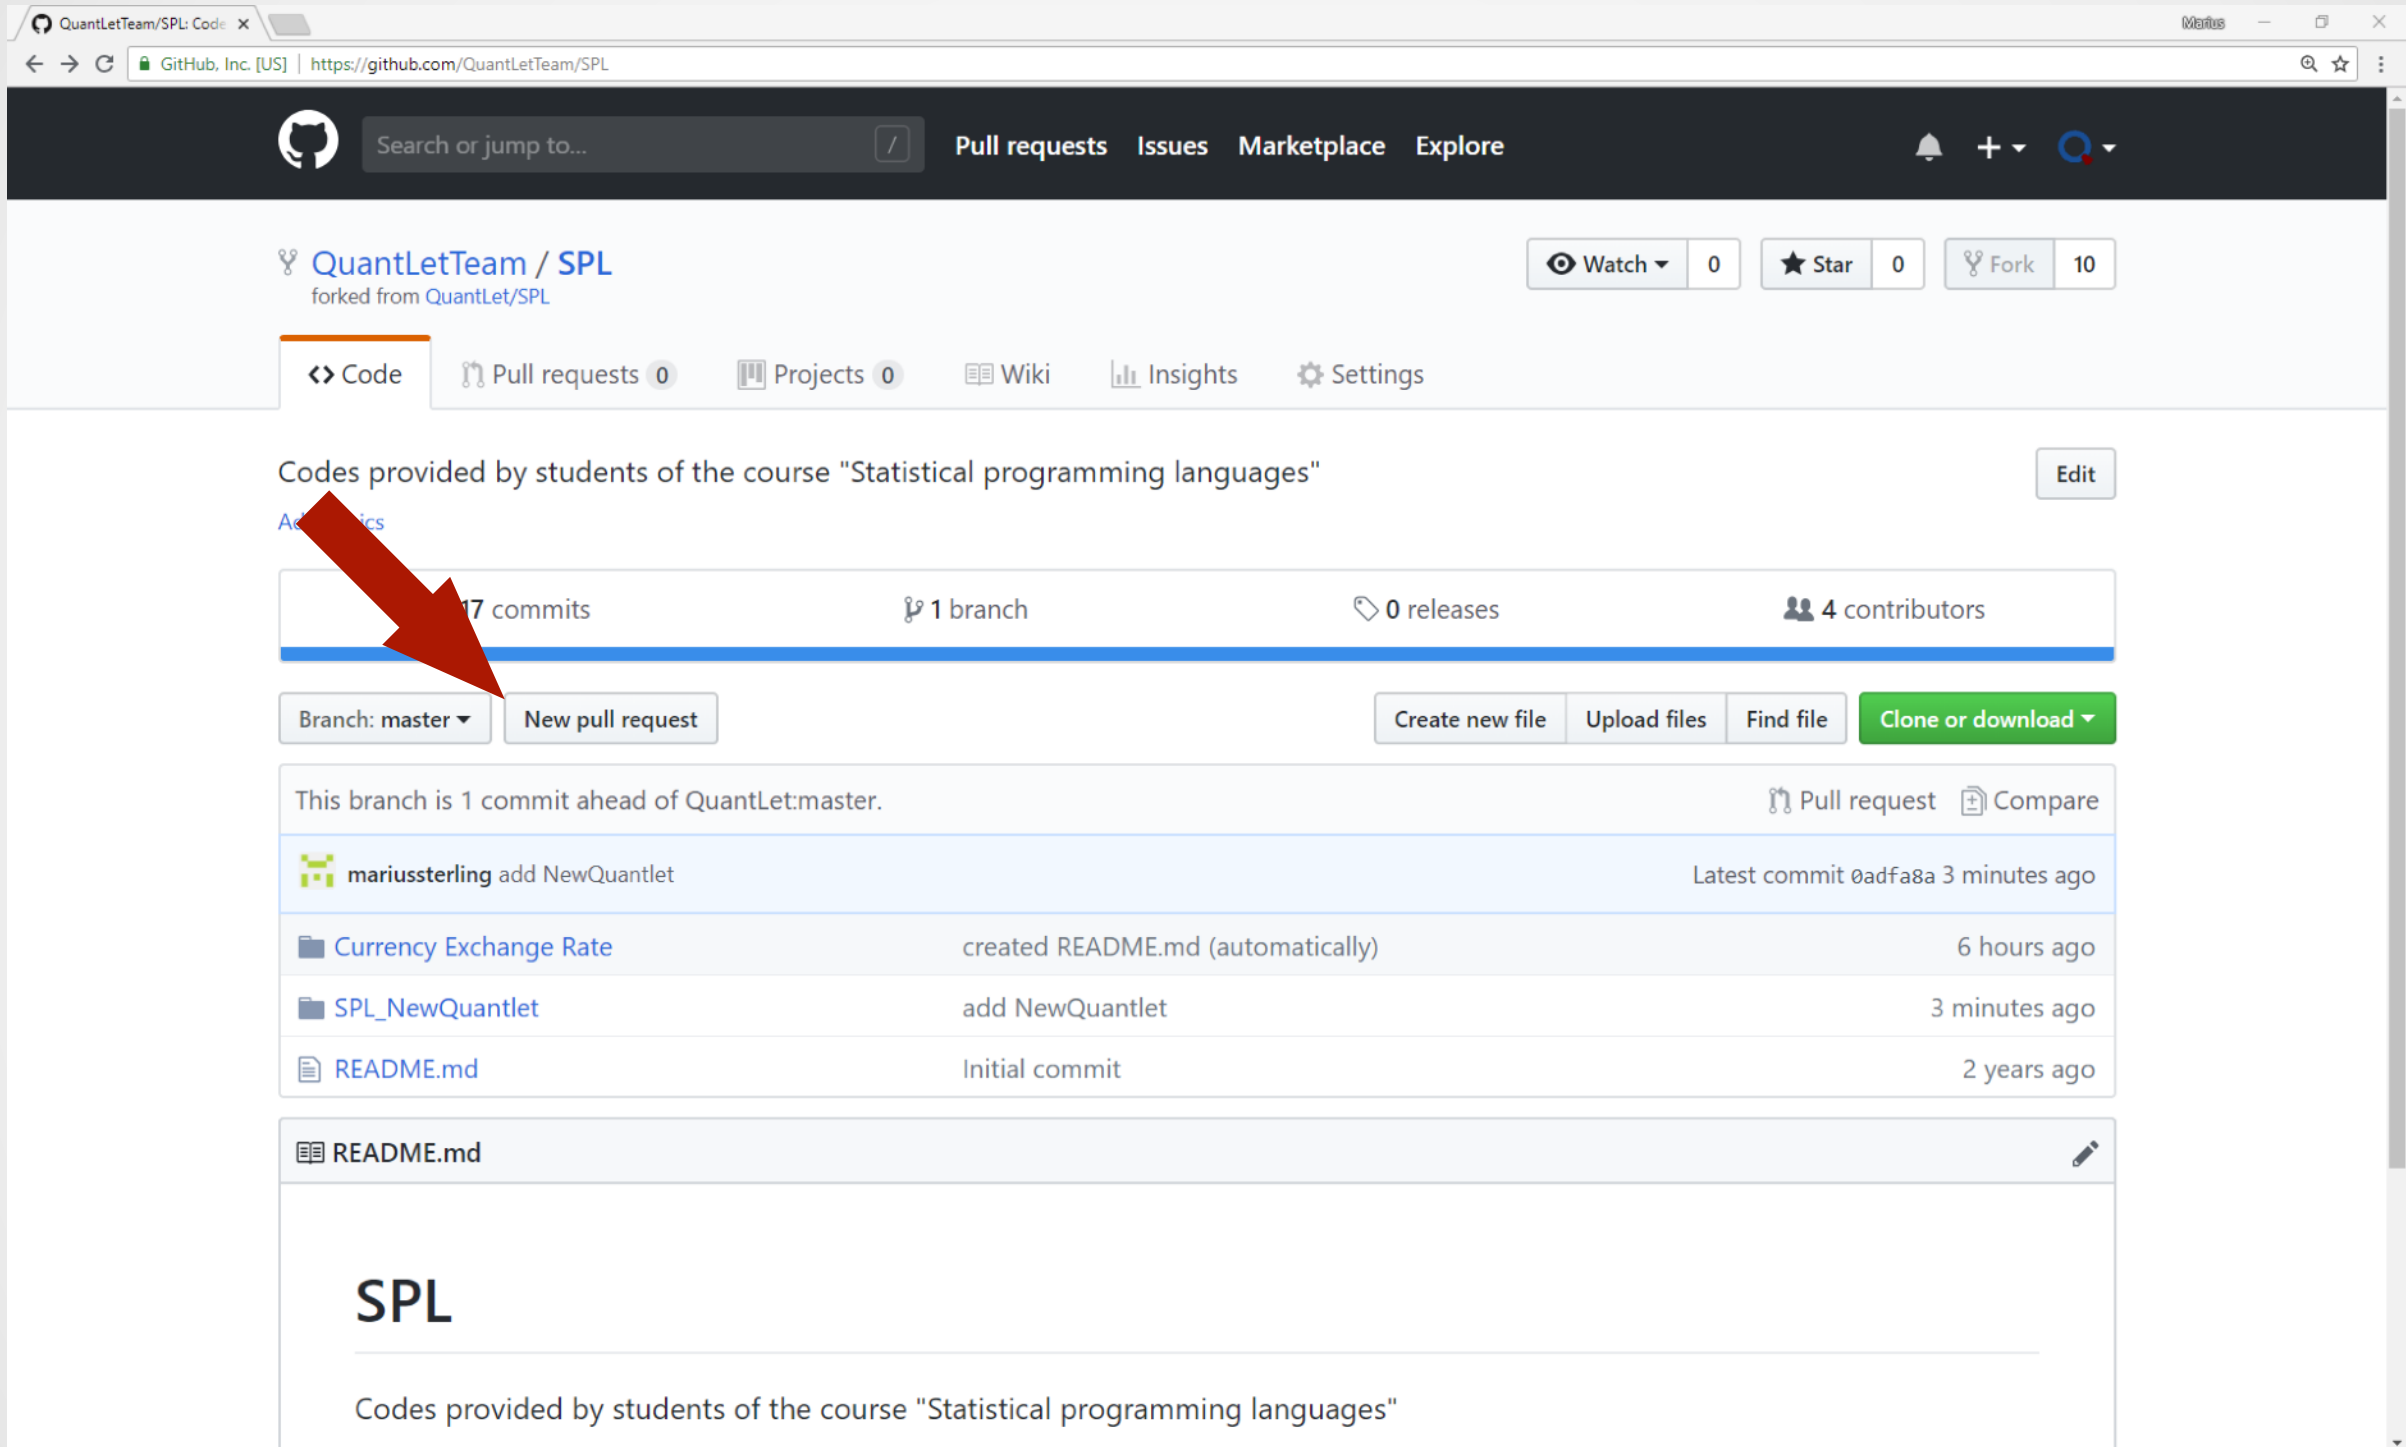

SPL

Codes provided by students of the course "Statistical programming languages"

Fork repository

Step 2: Commit changes

The screenshot shows the GitHub interface for the repository 'QuantLetTeam / SPL'. The repository is a fork of 'QuantLet/SPL'. The main content area displays the commit history for the 'master' branch, which is 1 commit ahead of the upstream 'QuantLet:master'. The commit history table lists the following commits:

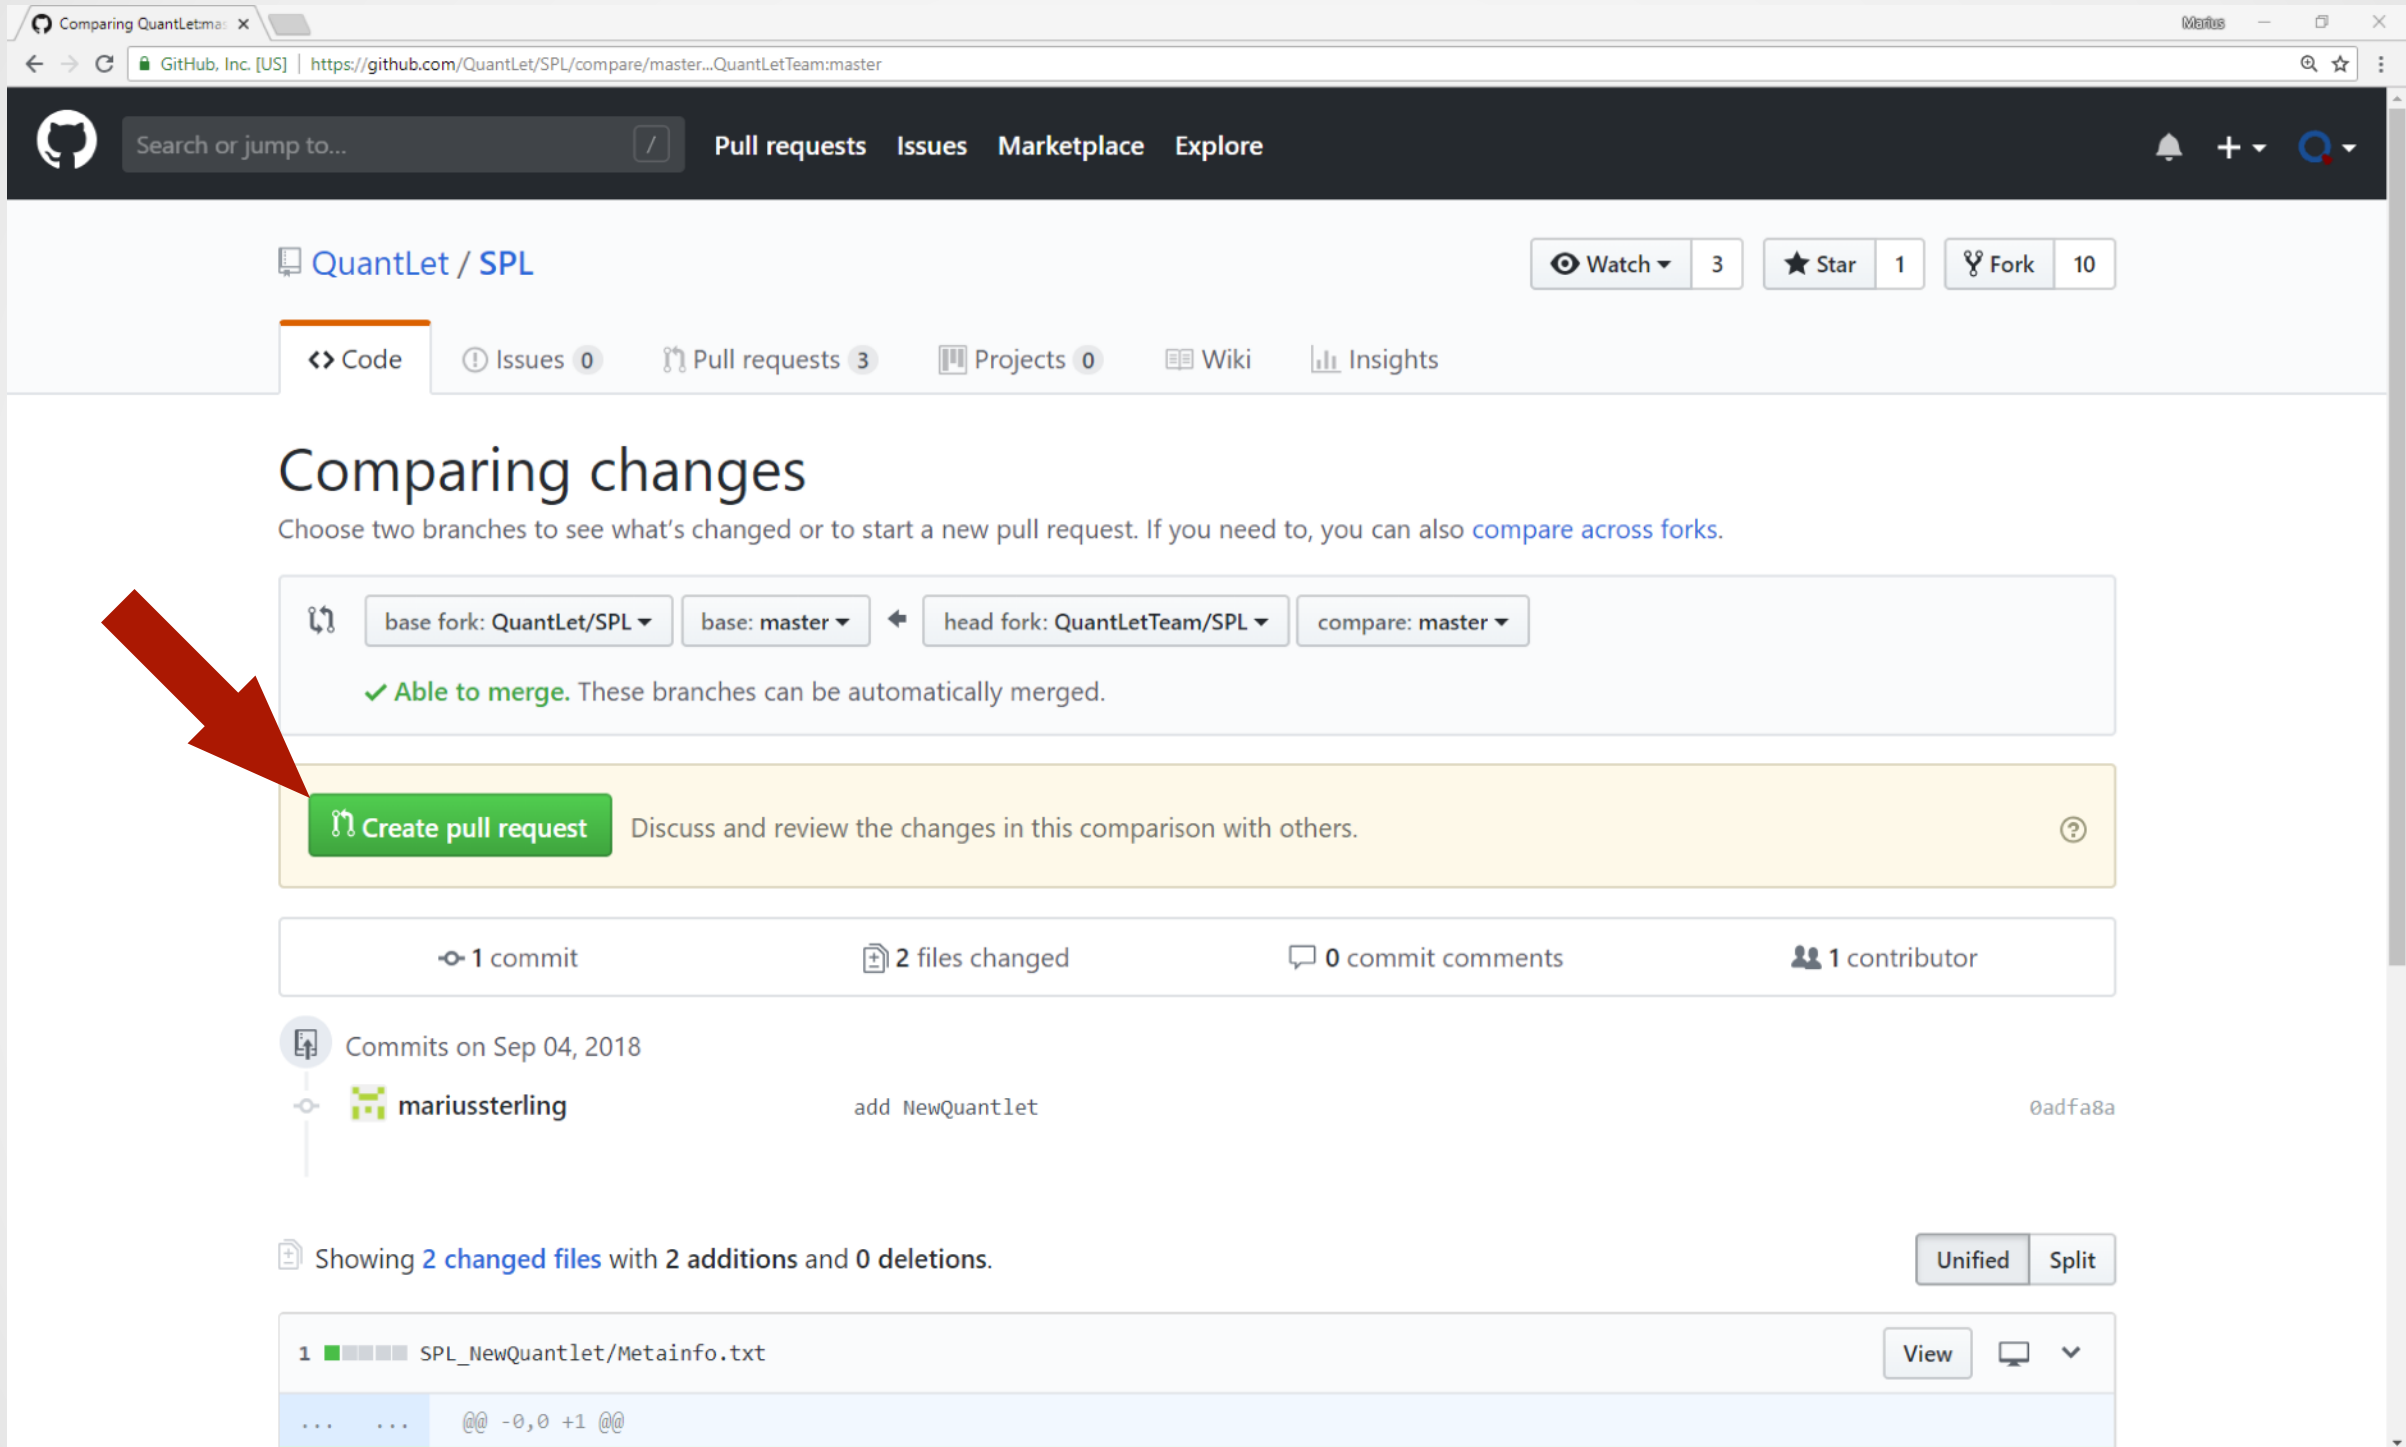

Commit	Author	Message	Time
Latest commit 0adfa8a	mariussterling	add NewQuantlet	3 minutes ago
6 hours ago		created README.md (automatically)	6 hours ago
3 minutes ago		add NewQuantlet	3 minutes ago
2 years ago		Initial commit	2 years ago

Below the commit history, the 'README.md' file is shown, containing the text 'SPL' and 'Codes provided by students of the course "Statistical programming languages"'. A red arrow points to the 'New pull request' button, which is located next to the 'Branch: master' dropdown.

Commit new Quantlet. Create New pull request.

Step 3: Create pull request 1

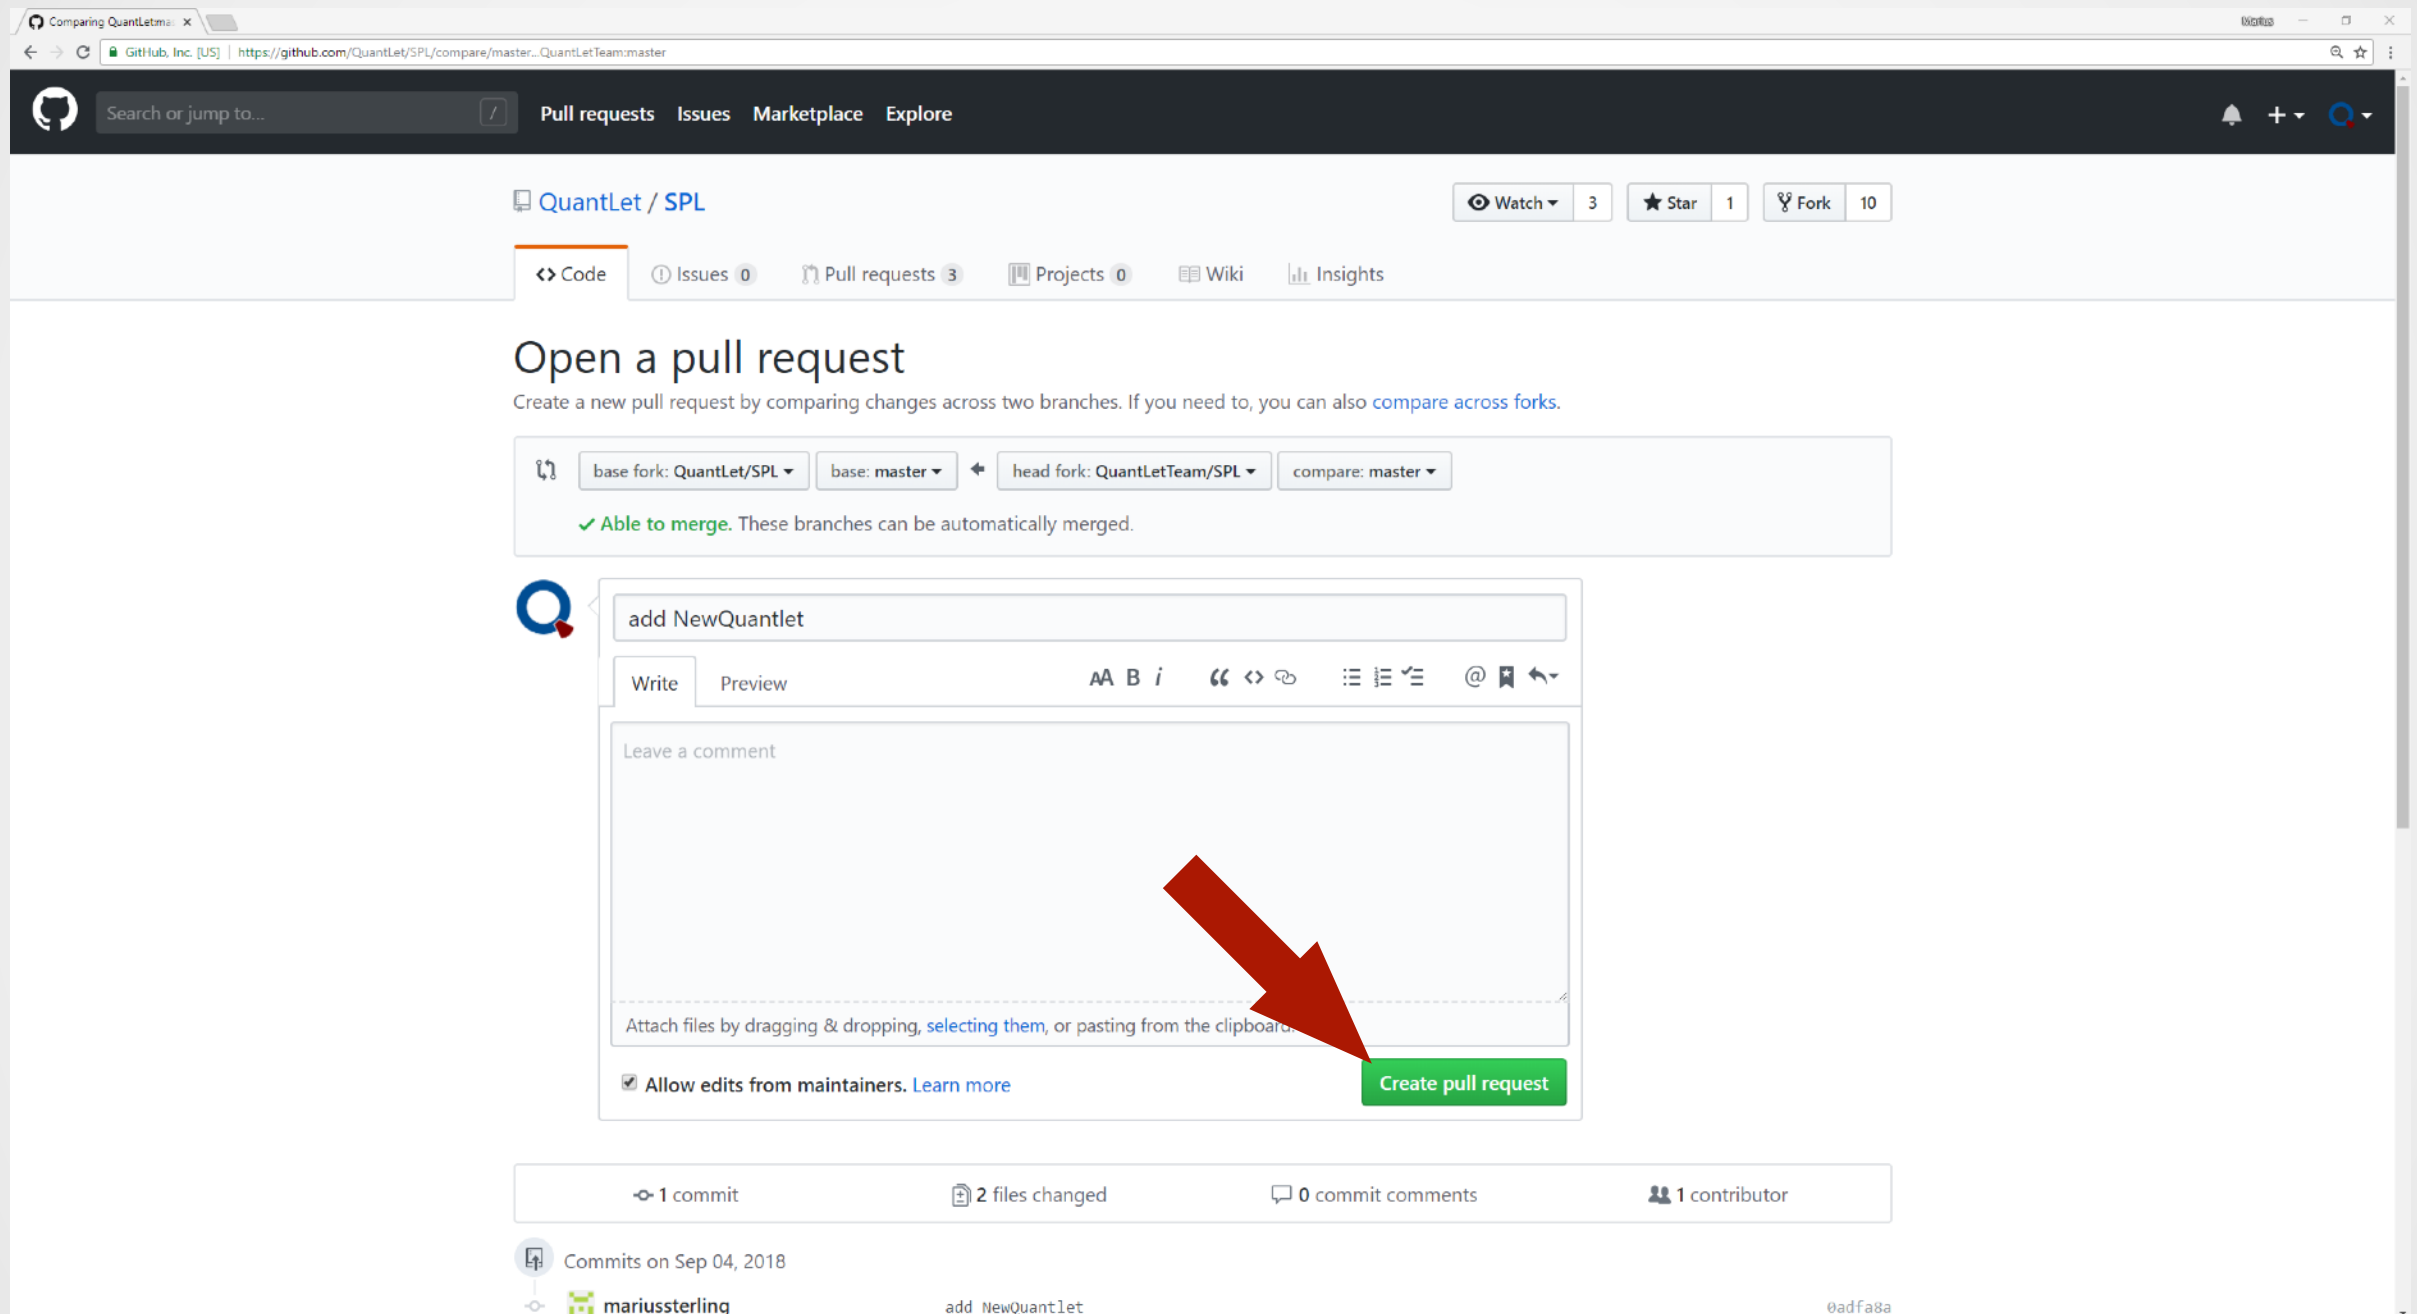

The screenshot shows the GitHub interface for comparing changes between two branches. The repository is 'QuantLet / SPL'. The comparison is between 'base fork: QuantLet/SPL' and 'head fork: QuantLetTeam/SPL', both on the 'master' branch. A green checkmark indicates 'Able to merge. These branches can be automatically merged.' A large red arrow points to the 'Create pull request' button, which is highlighted in green. Below the button, it says 'Discuss and review the changes in this comparison with others.' The interface also shows '1 commit', '2 files changed', '0 commit comments', and '1 contributor'. A commit by 'mariussterling' is listed with the message 'add NewQuantlet'. At the bottom, it shows 'Showing 2 changed files with 2 additions and 0 deletions.' and a diff view for 'SPL_NewQuantlet/MetaInfo.txt'.

Create pull request.

Step 3: Create pull request 2

Comment your submission and click Create pull request.

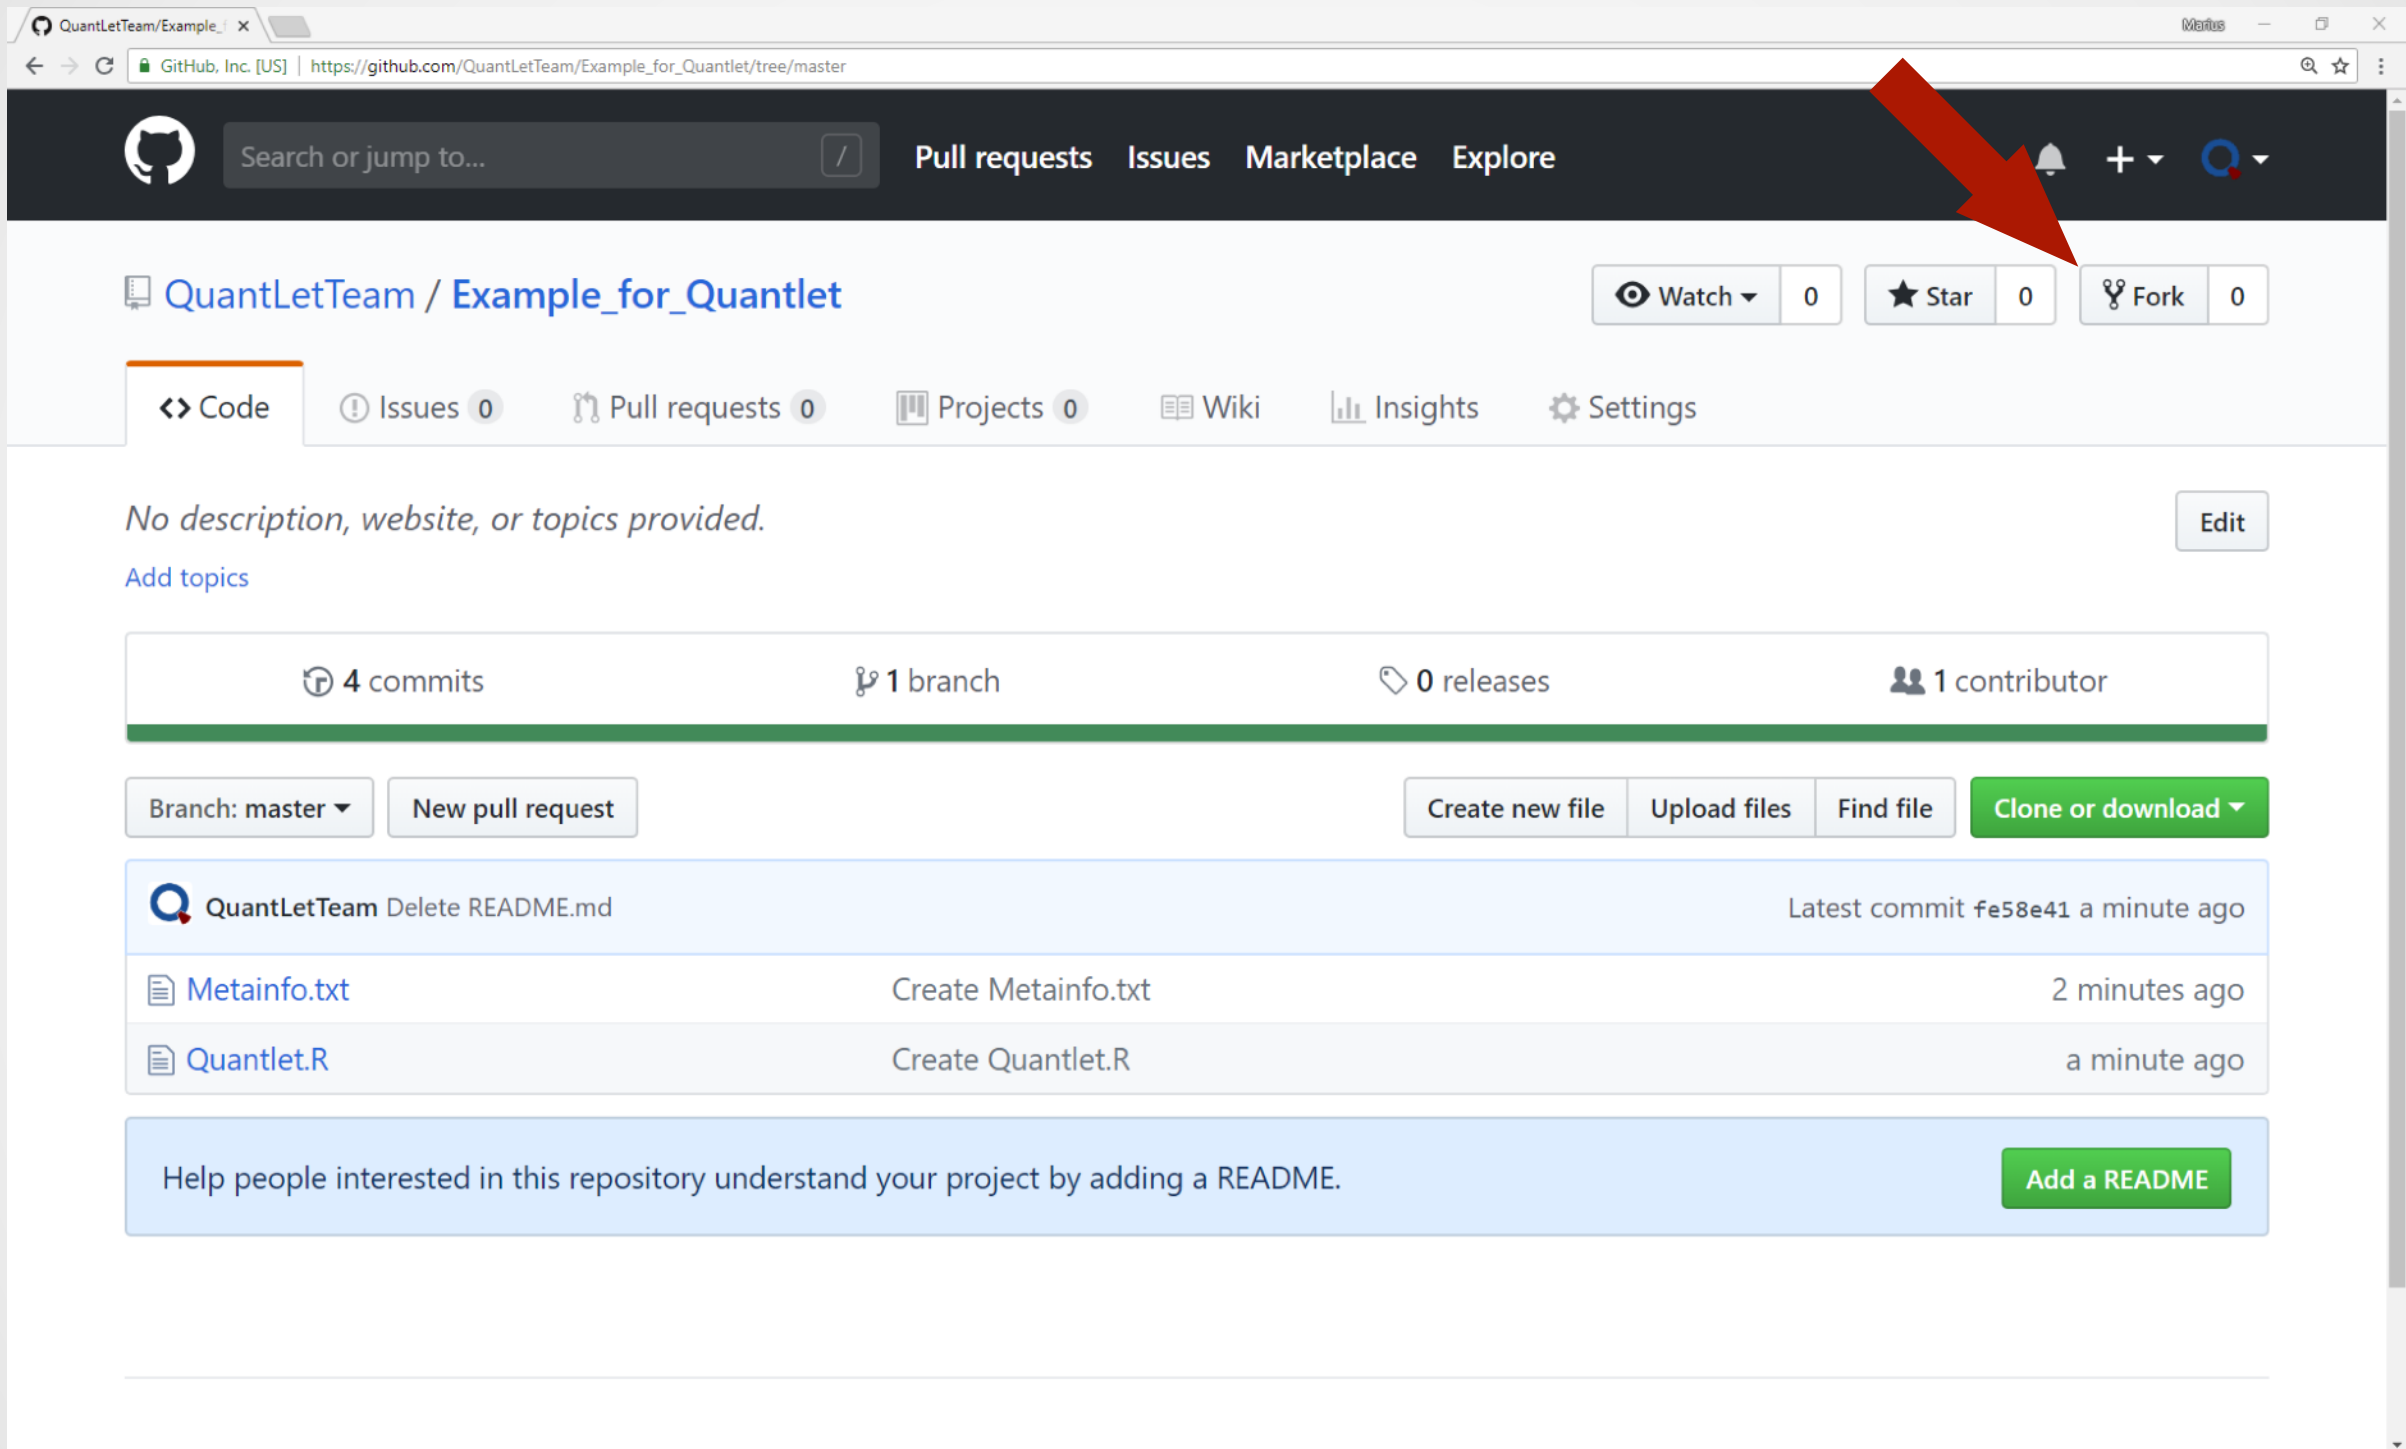

Step 3: Create pull request 3

- ▣ The pull request is sent to the repository admin who accepts or denies the commit.
- ▣ If you want to change something after an accepted pull request, commit new changes to your forked repository and create a new pull request.

2. Fork repository from your account to Quantlet 1

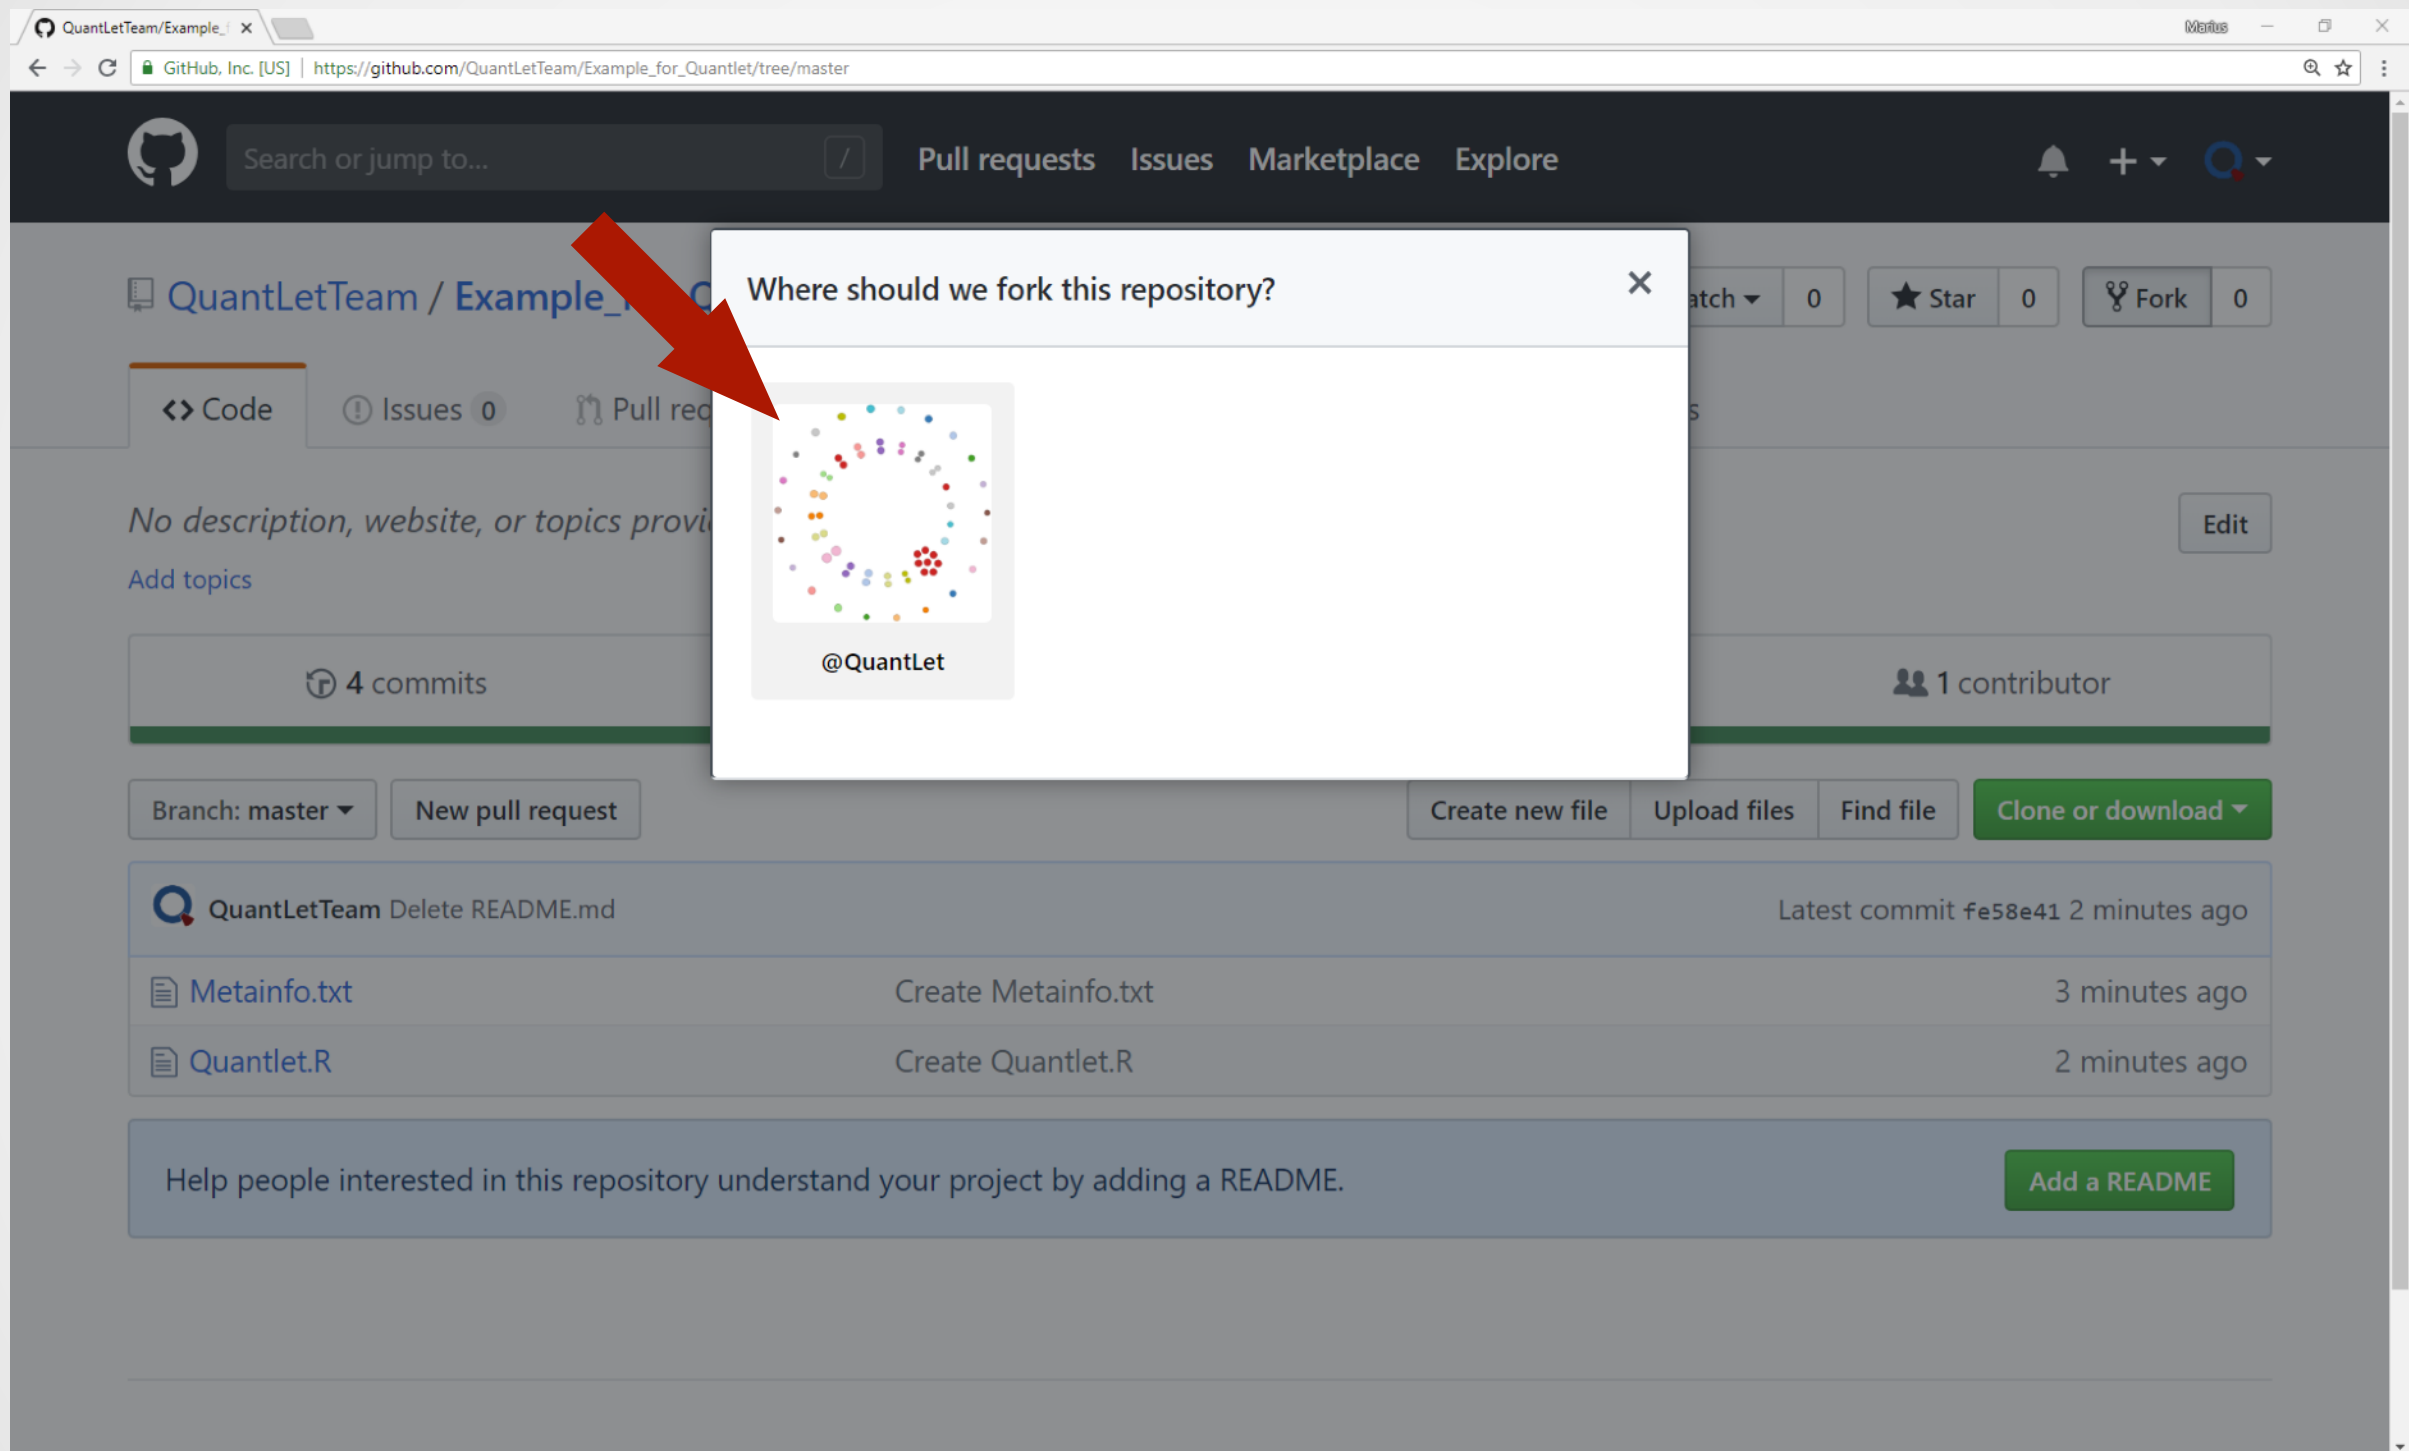

The screenshot shows the GitHub interface for the repository 'QuantLetTeam / Example_for_Quantlet'. The URL in the browser is https://github.com/QuantLetTeam/Example_for_Quantlet/tree/master. The repository has 4 commits, 1 branch, 0 releases, and 1 contributor. The 'Fork' button is highlighted with a red arrow. Below the repository information, there is a list of files: 'Delete README.md', 'Metainfo.txt', and 'Quantlet.R'. At the bottom, there is a prompt to 'Add a README'.

Go to the repository you want to fork into Quantlet. Click on Fork.

2. Fork repository from your account to Quantlet 2

Select the Quantlet organisation.

Responsibilities

- ▣ When you fork a repository into the Quantlet organisation, you are its creator and thus automatically admin!
- ▣ This brings some responsibilities:
 - ▶ Make sure every submitted Quantlet contains a Metainfo file.
 - ▶ Accept / deny pull requests by others.
 - ▶ Manage access privileges.

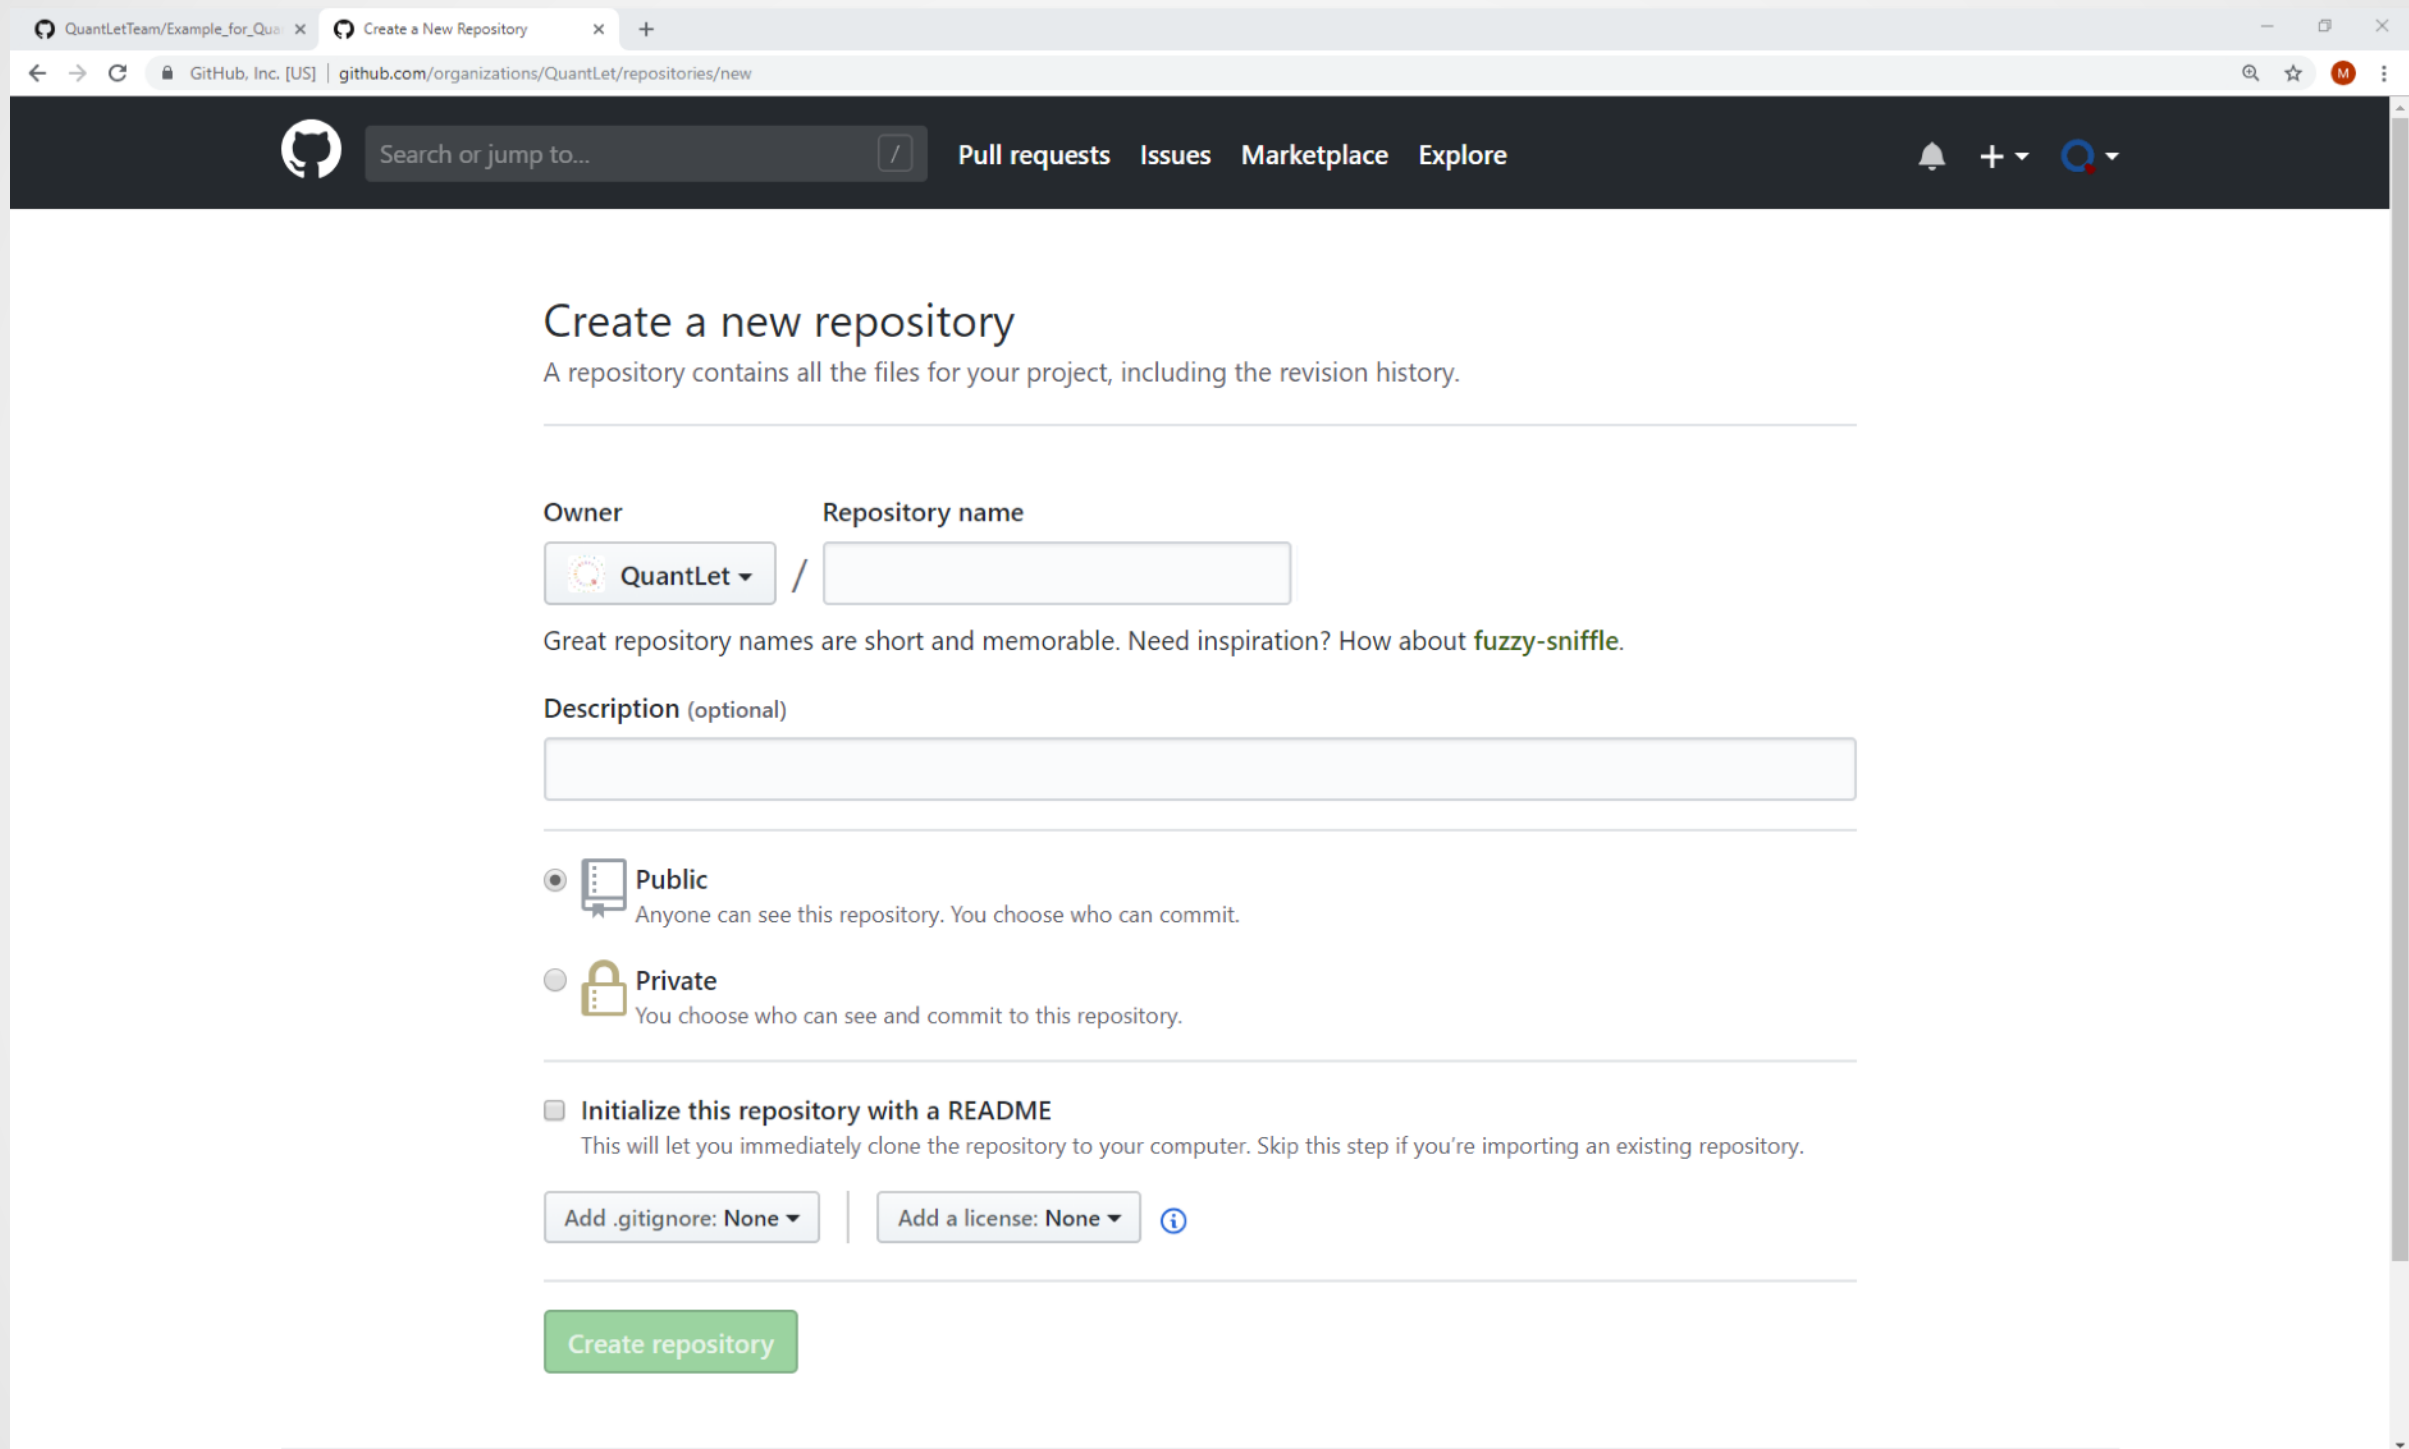

3. Create new repository 1

The screenshot shows the GitHub profile page for user 'LvB'. The profile information includes a circular avatar, the name 'LvB', the bio 'QuantNet Tokens for science', the location 'Humboldt-Universität zu Berlin', and the website 'http://www.quantlet.de'. Below the profile information, there are tabs for 'Repositories' (177), 'People' (86), 'Teams' (4), and 'Projects' (0). The 'Pinned repositories' section displays five repositories: 'Styleguide-and-FAQ' (2 stars, 38 forks), 'D3Genesis' (Forked from d3VA/D3Genesis, Development of the main D3 components for the QuantNet visualization, HTML), 'Git2Q3-Collaboration' (Forked from b2q/Git2Q3-Collaboration, Collaborative development of Quantlets), 'MVA-Plotly' (Forked from d3VA/MVA-Plotly, new MVA quantlets based on Plotly / D3 technology, R, 1 star, 1 fork), and 'CRIX' (Quantlets for CRIX, R, 10 stars, 12 forks). At the bottom of the page, there is a search bar, filters for 'Type: All' and 'Language: All', and a green 'New' button. A large red arrow points to the 'New' button.

Login GitHub and go to [GitHub.com/Quantlet](https://github.com/Quantlet). Click on New!

3. Create new repository 2

The screenshot shows the GitHub 'Create a New Repository' page for the organization 'QuantLet'. The page has a dark header with the GitHub logo, a search bar, and navigation links for 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The main content area is titled 'Create a new repository' and includes a description: 'A repository contains all the files for your project, including the revision history.' Below this, there are two input fields: 'Owner' (set to 'QuantLet') and 'Repository name' (empty). A tip suggests that great repository names are short and memorable, with an example 'fuzzy-sniffle'. There is also a 'Description (optional)' text area. Under the 'Visibility' section, 'Public' is selected, with a note that anyone can see the repository and choose who can commit. 'Private' is also an option, where you choose who can see and commit. At the bottom, there is a checkbox for 'Initialize this repository with a README', which is currently unchecked. Below this are two dropdown menus: 'Add .gitignore: None' and 'Add a license: None'. A green 'Create repository' button is at the bottom.

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner: QuantLet / Repository name:

Great repository names are short and memorable. Need inspiration? How about [fuzzy-sniffle](#).

Description (optional):

☒ **Public**
Anyone can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

☐ **Initialize this repository with a README**
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: None | Add a license: None ⓘ

Create repository

Give repository a meaningful name!

Responsibilities

- ▣ When create a repository in the Quantlet organisation, you are automatically its admin!
- ▣ This brings some responsibilities, see responsibilities in page 'Responsibilities' in the 2. Fork repositories to Quantlet.
